What is a gravatar?

A gravatar, or **globally recognized avatar**, is quite simply an avatar image that follows you from weblog to weblog appearing beside your name when you comment on gravatar enabled sites. Avatars help identify your posts on web forums, so why not on weblogs?

Stay up to date with [The Gravatar Weblog](#)

How do I get a gravatar?

Signing up for a gravatar.com account is **FREE**, and all that's required is your email address. Once you've signed up you can upload your avatar image and soon after you'll start seeing it on gravatar enabled

Gravatar / GitHub

The screenshot shows the GitHub interface for the repository 'defunkt/cache_fu'. At the top left is the GitHub logo and 'git repository hosting'. On the top right, the user 'topfunky' is logged in, with links for 'account', 'profile', 'help', and 'log out'. Below the navigation tabs (Source Browser, Commits, Wiki, Network (2), Watchers (12)), there are sub-tabs for 'master', 'all branches', and 'all tags'. The repository name 'defunkt / cache_fu' is displayed with 'fork', 'unwatch', and 'download' buttons. A note indicates 'this repo is viewable by everyone'. The description reads: 'Everyone's favorite memcached plugin for ActiveRecord.' The homepage is 'http://errtheblog.com' and the public clone URL is 'git://github.com/defunkt/cache_fu.git'. A 'first post' section shows a commit by 'defunkt (author)' from 'about 1 month ago'. The commit details show the commit hash '7b059349b40e567e31463f3b3c5883c60e765b65' and the tree hash 'f31c944f123a91c232ad8ba43429dc42b7a54f2a'. The file path is 'cache_fu / lib / acts_as_cached / fragment_cache.rb'. The file statistics show '100644', '118 lines (105 sloc)', and '4.848 kb'. The code content is as follows:

```
1 module ActsAsCached
2   module FragmentCache
3     def self.setup!
```

feeding the ducks

Sent Sunday, March 2 at 03:24 PM by Nate & Jana

Some nice photos of the kids feeding the ducks at Dad's new apartment - enjoy!

The screenshot displays the 'Catch the Best' web application interface. At the top, there is a blue header with the logo 'Catch the Best' and a gold fish icon. Navigation buttons include 'Settings', 'Log Out', 'Dashboard', 'Positions', 'Submissions', 'Sources', 'Team', and 'Help'. The main content area shows a job listing for a 'Developer' position, created on Wednesday, 10 October 2007. The listing includes a sidebar with actions like 'Call to Action', 'View Submissions', 'Add a Submission', 'Edit Job Details', 'Email Candidates', 'Archive Position', and 'Delete Position'. The job details section shows the 'Submission Email Address' as d6bb@c1.catchthebest.com and the 'Submission URL' as http://demo.catchthebest.com/apply/d6bb. The 'Job description' is 'Part-time web developer needed for Ruby on Rails projects.' Below this, a table lists 'Location' (Seattle, WA), 'Pay Rate', and 'Tax Term' (Contractor). A 'Submission Source Tracking' section is partially visible. On the right, a summary box shows 'Position status: Active' and '18 active submissions' with a button to 'Add a new submission'. Below that, a 'Candidate sources' section shows a pie chart with 'RubyNow (7.7%)' and a red circle with the number '3'.

Active Positions

- Developer
